Featured Projects

- **Ventura Holdings BD** — *WordPress (Elementor)*
<https://venturaholdingsbd.com>
Built a corporate real estate website with a scalable structure and performance-optimized layout. Delivered custom branded sections ensuring responsive design, fast loading performance, and professional service presentation.
- **B&B Education** — *WordPress (Elementor, ACF)*
<https://bandbeducation.com>
Developed a fully responsive education website under Global IT Solutions with structured content architecture and dynamic page building using Elementor and ACF. Improved UX, clean UI design, and client-specific customization.
- **Easy Jobs** — *Frontend (React, API Integration)*
<https://easy-jobs-one.vercel.app>
Developed a dynamic job listing interface using React with API-based data rendering. Implemented filtering logic and responsive UI components to improve usability and interaction flow.
- **Fruit Container Project** — *Frontend (JavaScript, UI Development)*
<https://fruitcontainer.vercel.app>
Designed and developed a responsive frontend UI project focusing on layout structuring and interactive behavior. Strengthened component-based frontend logic and UI development skills.
- **BMI & Age Calculator** — *JavaScript (DOM Manipulation)*
<https://avroshaheen.github.io/bmi-and-age-calculator>
Built an interactive calculator using JavaScript with real-time input processing and dynamic output generation. Improved logic building and DOM manipulation efficiency.
- **CSS Grid Challenge** — *HTML5, CSS3 (Layout Design)*
<https://avroshaheen.github.io/css-grid-challenge>
Implemented advanced CSS Grid techniques to build structured responsive layouts. Focused on modern layout control and responsive design principles.
